History

McLean was **founded in 1811** under a charter granted by the Massachusetts legislature and welcomed its first patient in 1818. As the “Asylum” division of Massachusetts General Hospital, it was the **first psychiatric hospital in New England** and only the fourth special institution for the treatment of the mentally ill in America.

In 1826, the Asylum was renamed “The McLean Asylum for the Insane,” **to honor John McLean**, a Boston merchant who donated \$120,000 to McLean through his estate (roughly equivalent to \$3.2M today).
